 value: _____
 Discount: _____
 id: _____
 }
}

Prod 1.
 ↑
 Cart - array = [{ name: 'prod 1',
 id: 'prod 1',
 { prod 2 },
 { product 3 },
 :]

new DeepCopy.

cartArray = ~~price~~ (-1, 0,)

cartArray.push (new - prod)

cartArray = 2467.

ask to guess = -

if its greater / less
 over to guess. if num === guess.
 array

Eg of do - while.

→ Guess a Number times = 5

5 → do { guess if (guess >= 100)
 } while (guess < 100)
 else if (guess < 100)
 else guess correct.
